Professor Hao Wang
Department of Electrical and Computer Engineering
School of Engineering & Science

Dear Professor Wang,

Increased student-faculty interaction and enhanced student learning are major contributors to student success and experience, a key element in our university's strategic plan. The way that faculty members teach and interact with their students, both in and out of the classroom, has a strong impact on student satisfaction, retention, and persistence to graduation. Student course evaluations serve as one of the metrics used to measure progress towards enhancing student learning.

The evaluations for this past semester (Fall 2025) indicate that you are doing an exceptional job! On average, students rated you 4.87 out of 5.0. Your outstanding evaluations are certainly something to be proud of. You are helping to set the standard for high-quality teaching here at Stevens, and your performance is something to which the rest of the faculty should aspire.

Thank you for your continued dedication to your subject matter, our students, this institution, and the art of teaching.

Sincerely,

David Zeng, Ph.D.
Senior Vice Provost for Academic Innovation and Faculty Affairs
Stevens Institute of Technology
